**Web Developer specializing in building responsive, multilingual,
and visually compelling web interfaces.**

SUMMARY

Dedicated Web Developer with hands-on experience at Al Jazeera Media Network, focused on creating striking, user-friendly, responsive interfaces. Skilled in both frontend technologies and WordPress development, with the ability to manage projects from initial concept through to deployment. Recently expanded expertise into mobile app development with Flutter, eager to apply my skills in dynamic, team-oriented environments.

CORE COMPETENCIES

Frontend Web Development, WordPress Development, Mobile App Development, User Interface (UI) Development, UI/UX Enhancement, HTML5, CSS3, JavaScript (ES6+), jQuery, Bootstrap, Flutter, API Integration, Cross-Browser Compatibility, Performance Optimization, Version Control (Git), Code Maintainability.

PROFESSIONAL EXPERIENCE

WordPress Developer (Freelance) | Khodor Baki Barbershop

August 2025 – September 2025

- Led the end-to-end design and development of a custom WordPress theme as a freelance project for a salon business, featuring an introduction, promotional video, pricing list, and embedded Google Maps showing multiple locations on the main page, along with a fully localized Arabic version on the second page.
- Implemented multilingual support and RTL (right-to-left) text formatting to cater to Arabic-speaking users, enhancing site usability and expanding the business's reach.
- Prioritized mobile-first design principles to ensure seamless functionality across devices, improving accessibility and providing a user-friendly experience for all visitors.

Web Development Intern | Al Jazeera Media Network

September 2024 – December 2024

- Rebuilt the Al Jazeera Terms and Conditions website from scratch using HTML, CSS, and Bootstrap, which exceeded expectations and ultimately replaced the live version of the site.
- Developed the large-scale, multilingual website for the Al Jazeera Centre for Studies, implementing dynamic carousels with jQuery to showcase books, authors, and research analyses effectively.
- Translated a complex, high-fidelity design for the humanitarian-focused 'Not Numbers' website, implementing scroll-based animations with GSAP to create an engaging and immersive user experience.
- Managed WordPress admin dashboards to enhance site functionality and streamline content workflows, supporting the network's editorial teams in daily publishing and content operations.
- Collaborated with designers and senior developers to ensure pixel-perfect execution of UI designs, maintaining adherence to brand guidelines and accessibility standards across all web pages.
- Secured a full three-month internship extension, beyond the standard term, based on exceptional performance, rapid learning, and consistent delivery of high-quality, production-ready code.

PROJECTS

Al Jazeera Centre for Studies ([Link](#))

This large-scale multilingual site for the Al Jazeera Centre for Studies showcases books, authors, eBooks, research briefs, and political analyses. It features dynamic content on events and news, available in English and Arabic, with interactive carousels and a structured layout.

Technologies Used: HTML, CSS, JavaScript, Bootstrap, jQuery (Slick Slider).

Al Jazeera Terms and Conditions ([Link](#))

Rebuilt Al Jazeera's Terms and Conditions site with HTML, CSS, and Bootstrap, creating a multilingual, responsive design supporting 7 languages. The project exceeded expectations and replaced the live site.

Technologies Used: HTML, CSS, Bootstrap.

Al Jazeera Not Numbers ([Link](#))

This website features advanced design elements like scroll-based animations, carousels, and visual depth, all aimed at raising awareness of the humanitarian crisis caused by Palestinian displacement. It's fully responsive, ensuring an optimal experience across both desktop and mobile devices.

Technologies Used: HTML, CSS, JavaScript, Bootstrap, jQuery (Slick Slider), GSAP via NPM.

Khodor Baki Barbershop ([Link](#))

Designed and developed a fully responsive website for a salon by building a custom WordPress theme. Created an intuitive interface to showcase services, pricing, and locations, with integrated Google Maps and full Arabic support. Emphasized clean design and mobile-first responsiveness for optimal user experience across devices.

Technologies Used: HTML, CSS, JavaScript, Bootstrap, PHP (WordPress Theme Development).

TRAINING AND CERTIFICATES

- Completed an extensive web development program at studioweb.com with lifetime access to over 350 video lessons, totaling 40+ hours of content. The course covered essential skills including HTML5, CSS3, JavaScript, PHP, SQL, and MySQL, applied through hands-on, real-world scenarios.
- Earned a series of foundational web development certifications at studioweb.com, covering HTML5, CSS3, JavaScript, and PHP. These courses strengthened core front-end and back-end development skills, including responsive design, interactive scripting, and basic server-side programming, providing a solid foundation for building functional and user-friendly web applications.
